Summary

Software engineering student at TEK-UP, currently looking for an internship, passionate about new technologies and constantly seeking knowledge to develop my skills. I have a solid theoretical foundation in computer science acquired during my studies, as well as practical experience through personal and academic projects.

Experience

CloudiaSys   June - August
Intern   remotely

🔗 https://cloudiasys.com

- Developed and maintained a high-traffic company website, improving responsiveness and user interaction with React and Node.js (Express.js) back-end."
- Implemented a full-featured training management system, increasing client engagement with seamless MySQL integration for data consistency.
- Enhanced security protocols by adding JWT-based authentication, reducing unauthorized access incidents.

Tecyom Digital Solution   June 15 - 15 September 2023
Intern   Tataouine(remotely)

- Designed and developed a classified mobile app in Flutter and Dart, increasing user engagement and optimizing load time
- Enhanced search functionality and user interface, leading to a smoother experience and a 20% increase in user retention.

TATA IT   July 22 - 22 august 2021
Intern   Tataouine(remotely)

- Built a dynamic website for an IT training center using Angular, Django, and PostgreSQL, boosting course registration rates.
- Improved database efficiency with optimized queries, leading to a faster load time.

Education

TEK-UP University   Since 12 Septembre 2022
Software engineering   Software Engineering

🔗 Tek-up

ISIM Gabes   2019-2022
computer science and multimedia   Licence

🔗 ISIMG

Academic Projects

DevConnect   2024- present
Networking social media platform
🔗 DevConnect

DevConnect is a full-stack web application built with React and NestJS. It's a platform for developers to share their projects, connect with others, and learn from each other's experiences

React, NestJS, MangoDB

FrankMe   2023-2024
File sharing platform
🔗 FrankMe

FRAKNME is a file-sharing app designed for content creators ,built with Angular and Nest Js, it provides a secure platform for users to share and sell their digital content.

Angular, Nest Js, Stripe, PostgreSQL

Wasl   2023-2024
Platform for packages transporting .
🔗 Wasl

- Developed a collaborative web platform in React and Spring Boot that connects package senders with travelers, reducing delivery costs.
- "Led a team of 3 to implement key features, resulting in a increase in successful user matches and PostgreSQL database integration for robust data handling

React, Spring Boot, PostgreSQL

Asky   2021-2022
Online education platform
🔗 Asky

mobile education platform dedicated to universities (forum application) in this application you will be able to connect as a student or teacher - students will be able to ask questions, add answers and surveys - they will also be able to join specific spaces created by teachers

Éducation Forums Questions, Flutter Dart Firebase

Skills

Technical:

Git, GitHub, GitLab, JavaScript (ES6+), Responsive Design (Bootstrap, Tailwind CSS), Angular, MERN Stack (MongoDB, Express.js, React, Node.js), Flutter, Dart, DevOps, CI/CD, Java, Spring Boot, NestJS

Graphic design :

Adobe Creative Suite (Photoshop, Illustrator, XD), Figma

Activities

AIESEC   2021-2022
Marketing and Graphic Design   Gabes

nuit d'info   2023
Participant   Tek-Up university
